ETIQMEDIA

What is Etiqmedia Mentor?

Etiqmedia Mentor guarantees the best management of your audiovisual content, from its capture and indexation, to its broadcast with live subtitles. For each piece of video it **generates subtitle and transcription automatically**, supporting **multiple languages**; **it also indexes each point of the video with its text**. Additionally, it automatically generates other metadata Such as **separation of participants**, transcription of the texts that appear in the image, or the **automatic categorization of the video** regarding Its thematic. With all this information the content is indexed into our file, this way you can make **searches that lead you to the exact point of a video** that interests you.

Principal platform functionalities
