

## ETIQMEDIA Ágora

Transparency and accessibility are the principles on which **Etiqmedia Agora** is based. Our platform guarantees law compliance of **transparency and accessibility** while optimizing the audiovisual resources.

Etiqmedia Agora Incorporates a **complete system of video proceedings** with its own platform of **video conference, live retransmission and session transcript automation**. It also produces the automatic subtitles in live videos as well as in previously recorded videos. All this in a simple and intuitive way, incrementing accessibility, interoperability and reuse of audiovisual resources.

*Comply with transparency law and make the most of plenary sessions with Etiqmedia Agora*

-  **Video proceedings:** it generates video proceedings semi automatically in order to guarantee law transparency compliance.
-  **Automatic subtitling:** It automatically subtitles the sessions, live as well as pre recorded.
-  **Integrated video conference:** Etiqmedia Agora has its own secured video conference system completely integrated into the flow.
-  **Recording and streaming:** the platform guarantees the highest quality in live recording and streaming.
-  **Automatic transcription:** transcribe your sessions into text automatically with over 95% success.
-  **Multilingualism:** Etiqmedia Agora Is able to work in Spanish , Catalan, Galician, and Basque.
-  **Searches:** it incorporates a potent search system which allows to locate the exact point in a video where a word has been said.
-  **Automation:** all processes can be done automatically with no human intervention required by the institution.

Etiqmedia Agora counts with a **consumer portal** where you can search and navigate nimbly through the content, which will count on subtitles and interactive transcription.

## What is Etiquedia Agora?

**Etiquedia Agora** guarantees video proceedings generation, transcriptions and subtitles with minimum human intervention. It automates the **realization process, capture and session streaming**, as well as its **subtitles and transcriptions**. It is able to pinpoint The **speaker's interventions** automatically and also **identify the participant**. It facilitates the secretary's signature in order to generate the **video proceeding**, allowing as well the verification of its validity against standard state platforms. Furthermore, it is the most complete search platform in the market, allowing you to **find the exact point in the video**, searching by word, participant, topic, date, etc.
